

NEW SOIL URGED FOR CUCUMBERS

Certain Diseases That Affect Vines Live Over From Year to Year in Ground.

ROTATION MADE ADVISABLE

"White Pickle" Believed to Be Caused by a Virus and Is Spread by Striped Beetles—Spraying of Vines Is Favored.

Certain diseases that affect cucumbers live over from one year to the next in the soil, investigation by the United States Department of Agriculture shows. A transfer to new soil each year in addition to seed treatment and spraying of the vine is found advisable to effect their control.

The ornamental wild cucumber vine is a factor in over-watering and spreading cucumber mosaic or "white pickle," one of the most serious diseases. Mosaic cucumber fruits are often deformed, mottled with green and yellow, and have minute, large dark green warts. The leaves turn yellow and die, leaving stretches of white stalks.

Disease does not live in the soil, but is believed to be caused by a virus which lives over winter in the wild cucumber seed and is spread by striped beetles. The cucumber beetles feed first on the diseased wild plants in the spring and then fly to the cucumber fields. The eradication of the wild cucumber is therefore recommended.

Cause of Downy Mildew. Downy mildew is prevalent in the eastern, southern, and to some extent in the North Central states, west of Illinois. It is caused by a fungus parasite, and can be checked by timely and thorough spraying with 4-50 bordeaux mixture.

Angular leaf spot or leaf blight is caused by a bacterial parasite and is carried by the seed. It can be combated best by treating the seed in a 1-1000 corrosive sublimate solution, washing them in running water afterwards and drying immediately. Disinfectants will be sent on application to the department. The disease may live over in the soil to a slight extent, making rotation advisable.

Cucumber anthracnose, recognized by brown dead spots on leaves and sunken areas on the stems and fruits is a fungus disease, which lives over winter in the soil and probably on the seed. Seed treatment and rotation are recommended.

Scab Is Fungus Disease. Cucumber scab is another fungus disease, known also as spot rot and pickle spot, which occurs mainly in the northern cucumber-growing sections. Stems and leaves are affected, and the most noticeable on the fruit. The disease lives over in the soil, and crop rotation is recommended.

Bacterial wilt is caused by bacteria which live in and clog the water-carrying vessels of the plants and causes them to die. The disease is

Long Green Cucumber, carried over winter and spread chiefly by striped cucumber beetles. It may be somewhat checked by pulling and burning or burying all wilted plants as soon as they appear and by spraying with 4-50 bordeaux mixture and arsenate of lead (four parts), the spray acting as a repellent and poison to the beetles.

DISEASE CAUSE OF LOSS

Corn Afflicted With Root Ailment Goes Down in Slight Storm—Poor Seed Blamed.

One reason corn lodges so badly is that the corn is afflicted with a root disease which causes it to go down even in a slight storm. Experiments have shown that this disease is transmitted at least partly through the seed. The United States Department of Agriculture urges that seed be field-selected from healthy stalks.

HIGHEST PRICES FOR WHEAT

Farmers of North Atlantic States Received More Than Those of the Other Sections.

North Atlantic farmers received more for their wheat per bushel by ten-year averages, than those of the other sections of the country from 1899-1975 to 1980-1985, after which they held second place and the highest prices went to the South Atlantic farmers.

EFFICIENCY OF COTTON DUCK

Material Made More Serviceable by Simple Methods of Waterproofing and Mildew Proofing.

Life of cotton duck, used for protecting farm machinery, sacked grain, market fruits, field crops, etc., may be prolonged and the cloth made more serviceable by simple methods of waterproofing and mildew proofing worked out by the United States Department of Agriculture.

IMMENSE DAMAGE BY INSECTS

Shade Trees and Ornamental Shrubs Injured to Extent of Ten Million Dollars Annually.

Shade trees and ornamental shrubs in the United States represent a value of one billion dollars, according to the estimate of the United States Department of Agriculture. Ten million dollar damage is done annually by shade-tree insects.

PROCESS OF GRADING UP ALL SCRUB HERDS

Resemblance of Purebred Sires Within Three Generations.

Under Skillful Management and Breeding Former Poor Stock Is Graded Up Within Comparatively Short Space of Time.

Once the use of purebred sires has become general throughout the country the process of grading up will be rapid. Many experiments and practical experience show that within three generations most of the individuals in the scrub herd headed by a good purebred sire resemble purebred animals in appearance. In a few more generations under skillful breeding and management, the former scrub stock is graded up to so great an extent that for production of meat and other animal products they are practically as useful as purebreds. The chief difference between a high-grade animal and a purebred is in the value for

Beef Cows, the Product of Proper Breeding.

breeding purposes. Only the latter can be used in producing purebred breeding stock. Moreover, only purebreds are eligible for registration in the different purebred associations. The Department of Agriculture, through its co-operative state agencies, is prepared to supply stock raisers with printed information that tells in popular language the best animal breeding methods and the advantages to be derived from their use. In addition the department furnishes an emblem of recognition, suitable for display, to every farmer who agrees to use only purebred sires and to co-operate in the improvement of the breed. To obtain the emblem the farmer or breeder is asked to fill out a simple blank showing the number and kind of stock he possesses and also to declare that all his male breeding animals are purebred.

TREATMENT FOR IMPACTION

Affected Animals Should Be Given Purgatives and See That Temperature Does Not Rise.

Impaction is a common condition in mature show cattle, says the Herford Journal. This condition may be observed in young cattle and even calves, but is unusual in them. The bacterial wilt is generally to be traced to the feeding of too much dry, bulky food. Such cases are most commonly observed in cattle that have been accustomed to eat little green, little grain. Occasionally animals become impacted because of the fact that they drink insufficient water. Cattle affected with impaction should be patient, for considerable time usually is necessary before the animal completely recovers. The affected animal should be given purgatives, and particular care should be exercised to see that they have no rise of temperature, which is indicative of inflammation of the bowels. It is always advisable in these cases to call in a good competent veterinarian.

TOMATO SEEDS ARE WASTED

Can Be Converted Into an Edible Oil and a Great Quantity of Meal for Live Stock Feed.

From 1,000 to 2,000 tons of tomato seeds go to waste each year in the big pulp plants east of the Mississippi river. Investigations by the United States Department of Agriculture indicate that they can be profitably recovered and converted into an edible oil and a press cake or meal for stock feed, with a loss of more than \$55,000 and a net of about \$35,000. Plants would operate two months a year on tomato seeds and might be used for grape and pumpkin seeds in addition, reducing the overhead.

EXERCISE IS OF IMPORTANCE

Necessary for Health of Brood Sow as Well as for Production of Strong Litter.

Make the sow take exercise; this is necessary for her own health as well as for the production of a strong litter. Shut her out of her pen during the middle of the day and feed her some distance from her sleeping quarters.

PRICES RECEIVED FOR CORN

Rocky Mountain and Pacific States Held Record From 1886-1878 to 1896-1905.

Corn prices at the farms of producers have been highest in the Rocky Mountain and Pacific states in averages of periods of years, from 1886-1878 to 1896-1905, after which the highest place has been held by the South Atlantic farmers.

Full Crops at Night

Fowls should have empty crops in the morning, and the crops should be empty at night until it is time to go to rest at night.

Right Amount of Tankage

In practically all feeding experiments with hogs it has been determined that from 8 to 10 per cent of tankage is about the right proportion.

Good All-Around Breed

The Fokk duck is a good all-around breed and when it is considered that a good income can be derived from the feathers, this is quite an item.

Any Farmer who can raise a few head of live stock can well afford to

add them for market.

THE MARKETS

BAITMORE—Wheat—No. 1 red winter, spot, \$2.07 1/2; No. 2 red winter, spot, \$2.07 1/2; No. 2 red garlicky, spot, \$1.94 1/2; November, \$1.94 1/2; December, \$1.94 1/2; January, \$1.97.

Corn—Track yellow corn for domestic delivery is quoted at \$1.07 per bushel asked for No. 2 or better. Cob corn is quoted at \$1.25 to \$1.40 per barrel for carloads prime new yellow on spot.

Oats—No. 2 white, 64 1/2; No. 3 white, 62; No. 4 white, 59.

Rye—No. 2 Western export, \$1.73 per bushel; bag lots of nearby rye, as to quality, \$1.75 to \$1.85.

Hay—No. 1 timothy, \$2.04; No. 2 timothy, \$2.04; No. 3 timothy, \$2.04; No. 4 timothy, \$2.04; No. 5 timothy, \$2.04; No. 6 timothy, \$2.04; No. 7 timothy, \$2.04; No. 8 timothy, \$2.04; No. 9 timothy, \$2.04; No. 10 timothy, \$2.04; No. 11 timothy, \$2.04; No. 12 timothy, \$2.04; No. 13 timothy, \$2.04; No. 14 timothy, \$2.04; No. 15 timothy, \$2.04; No. 16 timothy, \$2.04; No. 17 timothy, \$2.04; No. 18 timothy, \$2.04; No. 19 timothy, \$2.04; No. 20 timothy, \$2.04; No. 21 timothy, \$2.04; No. 22 timothy, \$2.04; No. 23 timothy, \$2.04; No. 24 timothy, \$2.04; No. 25 timothy, \$2.04; No. 26 timothy, \$2.04; No. 27 timothy, \$2.04; No. 28 timothy, \$2.04; No. 29 timothy, \$2.04; No. 30 timothy, \$2.04; No. 31 timothy, \$2.04; No. 32 timothy, \$2.04; No. 33 timothy, \$2.04; No. 34 timothy, \$2.04; No. 35 timothy, \$2.04; No. 36 timothy, \$2.04; No. 37 timothy, \$2.04; No. 38 timothy, \$2.04; No. 39 timothy, \$2.04; No. 40 timothy, \$2.04; No. 41 timothy, \$2.04; No. 42 timothy, \$2.04; No. 43 timothy, \$2.04; No. 44 timothy, \$2.04; No. 45 timothy, \$2.04; No. 46 timothy, \$2.04; No. 47 timothy, \$2.04; No. 48 timothy, \$2.04; No. 49 timothy, \$2.04; No. 50 timothy, \$2.04; No. 51 timothy, \$2.04; No. 52 timothy, \$2.04; No. 53 timothy, \$2.04; No. 54 timothy, \$2.04; No. 55 timothy, \$2.04; No. 56 timothy, \$2.04; No. 57 timothy, \$2.04; No. 58 timothy, \$2.04; No. 59 timothy, \$2.04; No. 60 timothy, \$2.04; No. 61 timothy, \$2.04; No. 62 timothy, \$2.04; No. 63 timothy, \$2.04; No. 64 timothy, \$2.04; No. 65 timothy, \$2.04; No. 66 timothy, \$2.04; No. 67 timothy, \$2.04; No. 68 timothy, \$2.04; No. 69 timothy, \$2.04; No. 70 timothy, \$2.04; No. 71 timothy, \$2.04; No. 72 timothy, \$2.04;
